## Summary

Final-year B.Tech CSE student (2027) and DevOps/SRE intern who owns 2 production systems end to end: self-managed infrastructure, CI/CD with automatic rollback, security hardening and encrypted backup/recovery. Hands-on with Docker, Kubernetes, Helm, Terraform on AWS, GitHub Actions and Prometheus/Grafana/Loki observability, with incident response practice through chaos testing, runbooks and MTTR tracking.

## Technical Skills

**Cloud & IaC:** AWS (EC2, ECS, ALB, ECR, S3, IAM, VPC, CloudWatch), GCP, Vercel, Terraform (modules, remote state, OIDC)
**Containers & CI/CD:** Docker, Kubernetes, Helm, GitHub Actions, GHCR, Trivy, kubeconform, automated test gating, rollback
**Observability & SRE:** Prometheus, Grafana, Loki, Promtail, alerting rules, P95/P99 latency, runbooks, postmortems, MTTR, chaos testing
**Security:** CSP, HMAC signing, AES-256 encryption, least-privilege IAM, secrets management, image scanning
**Linux & Networking:** Ubuntu, systemd, Nginx (reverse proxy, TLS), Bash, TCP/IP, DNS, HTTP/S, CIDR, firewalls
**Languages:** Python, Bash, JavaScript (Node.js), SQL, C++ **Data:** PostgreSQL, Redis, MySQL, MongoDB

## Experience

**D-Tech Solution Integrators** Aug 2026 – Present
*Software & Solutions Architect Intern* *Bharuch, India*

- **Platform owner for 2 production systems**, dtechindia.com and bccibharuch.in (BCCI membership portal), across infrastructure, delivery, security and data protection.
- Re-platformed D-Tech from Vercel serverless to a containerised Node.js service behind Nginx (TLS, rate limiting) on a self-managed Ubuntu VPS, running as a non-root, read-only container.
- Built GitHub Actions CI/CD with test and CSP gates, container smoke tests and digest-pinned images; health-checked rollouts **auto-roll back** on failure, deployed with a least-privilege deploy key.
- Implemented backup & disaster recovery: nightly **AES-256 encrypted off-site backups** with scripted restore.
- Enforced a security baseline: hash-based CSP (no `unsafe-inline`), HttpOnly/SameSite=Strict sessions, rate limiting, file-signature validation and HMAC-signed expiring URLs; isolated PII in a private repo behind a Git-backed CMS.
- Architected BCCI for portability (Vercel or Docker, Redis or Postgres) with **675+ automated tests** gating CI; shipped the full membership lifecycle: OTP auth, document intake, approval workflow, QR credentials, renewals, event ticketing.

**Google Developer Student Club, PPSU** Aug 2023 – Jan 2024
*Cloud Event Manager* *Surat, India*

- Ran **25+** hands-on GCP labs and mentored a 12-member team that deployed **8** applications on GCP.

## Projects

**CI/CD Pipeline with Docker, Kubernetes & Helm** | *GitHub Actions, Helm, Trivy, Prometheus, Grafana* GitHub

- Gated every image with lint, Jest coverage thresholds, npm audit and Trivy/kubeconform scans; atomic Helm upgrades ship code in **under 5 minutes**.
- Wrote a 12-object Helm chart (HPA, PDB, NetworkPolicy, ServiceMonitor) on a 3-node kind cluster with hardened pods and a draining readiness probe for zero failed requests during rollouts; added P50/P95/P99 dashboards and **11 alert rules**.

**Terraform AWS ECS Platform** | *Terraform, AWS ECS, ALB, VPC, IAM, GitHub OIDC* GitHub

- Provisioned a multi-module platform: VPC, ECS cluster, ALB across **2 AZs**, ECR with image scanning and CloudWatch alarms, using S3 + DynamoDB-locked remote state.
- Removed long-lived AWS keys by using GitHub OIDC role assumption; enforced IMDSv2, least-privilege IAM and SSM access (no SSH).

**Aegis: SRE Incident-Response Copilot** | *Python, FastAPI, Prometheus, Grafana, Loki* GitHub

- Built an observability stack validated with chaos injection and MTTR tracking; paired threshold alerts with z-score anomaly detection to merge related signals into one root-caused incident, with human-approved fixes and 4 runbooks.

## Education & Certifications

**P.P. Savani University** Jul 2023 – Jun 2027
*B.Tech in Computer Science and Engineering* *Surat, India*

- AWS Cloud Foundations (May 2026) • Open source contributor, Bindu: Python error-handling fixes (Feb 2026)
